The purpose of this revision is to add both 2,5-dimethoxy-4-(n)-propylthiophenethylamine and N-benzylpiperazine to Schedule I. The Drug Enforcement Administration has made these additions at the Federal level since our last publication of the *List of Controlled Substances for the State of Arkansas*. Arkansas Code Ann. § 5-64-201 et. seq. through § 5-64-216 grants the authority to revise and republish the *List*. The same codes mandate that substances controlled at the Federal level be similarly controlled in Arkansas after such notice is received. This revision is to comply with that mandate.
